FJO National Course 2019

We started the 4th edition of the National Course of Functional Jaw Orthopedics.

We thank the entire team for the commitment to continuous improvement, which allowed us to reach the first goal of 2019: complete class / 18 seats filled. A special thanks to the trainees and to all those who have recommended our course and who trust us!

FJO French Course 2018/2019

On March 11, 12 and 13, we will have with us our beloved "guiding star"!

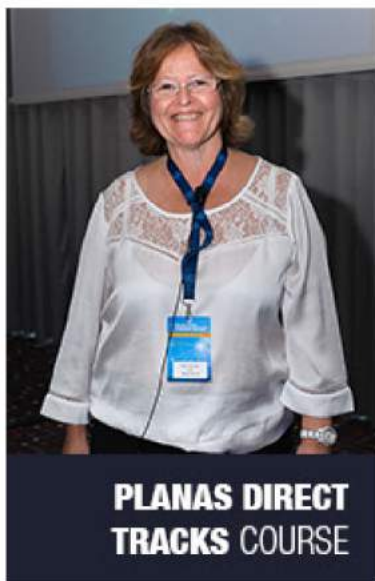

She has over 50 years of clinical practice exclusively in Functional Jaw Orthopedics and she comes to teach us. Always innovating in her appliances and in her clinical practice, she will share these experiences in a 3 days module.

FJO – Update and Improvement

The Lisbon School has prepared another 3 module training dedicated to all those who already know the basis about Functional Jaw Orthopedics and have clinical practice.

The course is based on the most current knowledge of Dr. Wilma Simões' appliances and aims at the elaboration of diagnoses, prognoses and treatment plans according to the Functional Jaw Orthopedics specialty.

PLANAS DIRECT TRACKS COURSE

Planas Direct Tracks Course

After the successes of previous editions, It will start in June the third edition of the Planas Direct Tracks Course, taught by Prof. Dr. Maria Regina Brandão, the idealizer of the indirect Planas Direct Tracks method with platis.

This training enables the professionals to perform an early treatment of malocclusion of the Planas Direct Tracks and selective griding, according with the Neuro-occlusal Rehabilitation principles.

How are our treatments at the **Lisbon Clinic**

CLINICAL CASE
M.A - FEMALE | 6,8 YEARS

MAY 2016 NOVEMBER 2018 MAY 2016 NOVEMBER 2018

1.1 - EXTRA-ORAL PHOTOGRAPHS

JULY 2016 NOVEMBER 2018

1.2 - TELERADIOGRAPHY

JULY 2016 JANUARY 2019

1.3 - INTA-ORAL PHOTOGRAPHS

DIAGNOSTIC

Female patient with 6 years and 8 months, with distocclusion and open bite. She was a oral breather, had adenoids hypertrophy and a reduced upper airway. She had lip incompetence and speech problems.

TREATMENT

Therapeutic posture change in pro-rotation with bioelastic appliances SN3 and SN1 for a 30 months period.

CLINICAL RESULTS

Closing the bite. We obtained the DA contact, we get lip closure, get a increased upper airway and a better speech.
