

Craniofacial growth x Malocclusion Why early interventions?

PROGRAM

SEPTEMBER 26, 2019 - PRE-MEETING	THURSDAY
8:30	Oral presentations selected (6 presentations of 10 minutes each)
9:30	Course - Dr. Wilma Alexandre Simões (Brazil) - Functional Jaw Orthopedics
11:00	Coffee break
11:30	Course - Dr. Wilma Alexandre Simões (Brazil) - Functional Jaw Orthopedics
13:00	Lunch
14:00	Oral presentations selected (6 presentations of 10 minutes each)
15:00	Course - Dr. Sandra Coulson (USA) - Myofunctional therapy
16:00	Coffee break
16:30	Course - Dr. Roger Price (USA) - Functional breathing
17:30	Book launch/lectures 2 books will be launched and the authors will lecture about subjects inserted on the books
	Marina Batista Borges Pereira (Brazil) <u>Book:</u> Functional Jaw Orthopedics: An infant-clinic approach. <u>Theme:</u> Perinatology under the dentist vision.
	Sílvia Chedid (Brazil) <u>Book:</u> Orthopedics and Orthodontics for Deciduous Dentition. <u>Theme:</u> Timely intervention to prevent malocclusion in children.
18:30	Dr Marcos Nadler Gribel (Brazil) Innovation session: Digital Workflow for direct tracks: Easier, Faster and Accurate

Craniofacial growth x Malocclusion Why early interventions?

SEPTEMBER 27, 2019 - MEETING

FRIDAY

- 8:30** Opening Session
Opening ceremony by the meeting president – **Dra. Patrícia Valério** (Brazil)
Explanation about the relevance of a meeting divided in sessions. The logical sequence of the speeches. The importance of dissemination of functional medicine and the paradigms changing.
- 9:00** WSEI president speech– **Dra. Carina Pereira Leite Esperancinha** (Portugal)
WSEI and the dissemination of Simoes Network in the European scenario as well as in other continents. The Prevalence and Risk of malocclusions on young children.
- 09:30** IFUNA president speech – **Dr. Michael Gorbonos** (Israel)
The importance of IFUNA. How to explain to the public the relevance of searching for a Functional evaluation of children and how can it promote correct growth and development? The experience in Israel using television and social media to disseminate it.
- 10:00** **Dr. Gabor Hermann** (Hungary)
The importance of new skills of IFUNA. The actuation fields of functional medicine.
- 10:30** **Dr. Wilma Alexandre Simões** (Brazil)
Understanding why early interventions through Simoes prevention levels concepts.
- 11:15** Coffee-break – Poster session

This meeting will be divided in sessions to allow to the audience a sequence of logical thinking and a complete understanding of each session subject. Due to that we have 4 chairs, that are scientific formed professionals and they will be in contact with the speakers during the months before the event, guiding them speakers to supply the expectation for this meeting.
So, the title of the speech is not the most important. The important is the main content.

SESSION: Behavioral aspects of functional therapies. Chair: **Oya Kademoglu** (Turkey)
The aim of this session is to insert behavioral aspects, that influentiate traditional therapeutics.

- 11:45** **Dr. Maria Vasilyeva** (Russia)
Will must talk about her experience on changing paradigms since she is an orthodontist but she has a more general comprehension of human beings and she will focus on this changing of paradigms to allow complete and correct stimulus for child growth.

Craniofacial growth x Malocclusion Why early interventions?

SEPTEMBER 27, 2019 - MEETING

FRIDAY

- 12:15** Dr. Fabiola Limardo (Argentina)
Will talk about the behavioral aspect involved on the development of the occlusion. Will make a speech supported by science showing that: The human body needs to be considered a dynamic process and must be understood as a living organism.
- 12:45** Dr. Kerl Toham (Lituania)
Will talk about her experience in treating babies and young children, using alternative therapeutics to guide craniofacial growth and development. She uses sound vibration to alter postures.
- 13:15** Lunch
- SESSION:** Functional Medicine. Chair: Dr. Marius Catiche (Germany). The chair will ask to focus on functional clinical therapeutic approaches that promote or allow recovering the correct craniofacial growth. The chair will also encourage them to describe specific critical points that must be observed to avoid making mistakes on the selected approaches.
- 14:15** Dr. Eyal Botzer (Israel)
The relevance of breast feeding not only on nutrition and psychological aspects but also as craniofacial growth guide focusing on his huge experience on tongue tie approaches.
- 14:45** Marie Joseph Deshayes (France)
Will talk about her approaches and experience treating patients until the age of 6.
- 15:15** Dr. Shinichi Arita (Japan)
Will talk about his experience with position of sleep and type of nutrition as a guide to correct growth and development in young babies.
- 15:45** Dr. Wilson Aragão (Brazil)
Will discuss his experience in promotion of adequate craniofacial growth and development on children with mixed dentition.
- 16:15** Coffee-break/poster session
- 16:45** Dr. Cristina Pimenta Póvoas (Portugal) Dr. Mercedes Gálvez (Spain) Dr. Delfino Allais (Italy)
They will show their clinical experience in promoting correct cranio-facial growth for children and adolescents and the functional approaches used to do it.

Craniofacial growth x Malocclusion Why early interventions?

SEPTEMBER 27, 2019 - MEETING

FRIDAY

- 17:45** Dr. Phillipe Rol (France)
What is the relevance of postural evaluation to plan a good intervention of malocclusion in children?
- 18:15** Dr. Charles Lelouche (France)
Will focus on his own experience on dealing with malocclusion in children.
- 18:45** Dr. Banu Yeşilbek (Turkey)
Will focus on the use of SN3 to close the goniac angle of hyperdivergent patients.
- 19:15** Dr. Sandra Coulson (USA)
Will talk about the interface between dentists and myotherapists and its relevance to promote stable and correct craniofacial growth.
- 21:00** Gala dinner

SEPTEMBER 28, 2019 - MEETING

SATURDAY

SESSION: Functional Jaw Orthopedics Basics. Chair: Dr. Sérgio Nakazone (Brazil). The chair will guide the speakers to discuss specifically about some aspects, according to their expertise. The chair will formulate questions to each speaker during the meeting preparation.

- 08:30** Dr. Carlos Planas (Spain)
Will discuss the basic concepts of Planas approaches guided by the questions sent previously by the chair.
- 09:00** Niels Hulsink (Netherlands)
Myofunctional Research Company approaches for early interventions.
- 09:30** Dr. Rainer-Reginald Miethke (Germany) /Dr. Maria Rita Sancho Rios (Brazil) -45 minutes shared by 2 speakers.
Dr. Mietke will discuss about the prevalence and differential diagnosis of hemifacial microsomia and Dr. Sancho will show her experience with functional Jaw Orthopedics approaches to treat HM and avoid surgery.

Craniofacial growth x Malocclusion Why early interventions?

SEPTEMBER 28, 2019 - MEETING

SATURDAY

- 10:15** Dr. Myroslava Drohomyyretska (Ukraine)
Will discuss the Dental Body Synergy concept by showing the connections between occlusion and posture and also the importance and necessity of an interdisciplinary approach.
- 10:45** Coffee break/poster session
- 11:15** Dr. Patrícia Valério (Brazil)
Revisiting the Wolff's law. Why posture changing leads to malocclusion corrections?
- 11:45** Dr. Andrea Deregibus (Italy)
The bases for BRACCO appliances functioning.
- 12:15** Dr. Bárbara Bimler (Germany)
Bimler appliances and their fundamental principles of action.
- 12:45** Dr. Ritsuki Ito (Japan)
The effectiveness of Bimler approaches according to their bases.
- 13:15** Dr. Francisco Macedo (Brazil)
The scientific bases for Planas Laws of Growth and Development.
- 13:45** Lunch

SESSION: Breathing and Sleeping. Chair: Dr. Regina Queiroz (Italy). On this session, the speakers will focus on their own experience using different approaches, to re-establish correct breathing in children and focusing on the prevalence of obstructive sleep apnea in children. They will also talk about breath and OSA in adults but the main focus will be children.

- 14:45** Dr. Roger Price (USA)
What is airway dysfunction? How does the body compensate these dysfunctions?
- 15:15** Dr. Rita Tavares (Portugal)
What is your experience in showing the importance of correct breathing? How can you make an understanding of the relevance of that?
- 15:45** Dr. Inês Mendes (Portugal)
How Myofunctional Therapy can help in breathing disorders? What is your experience about the accomplishment of the patients and their family?

Craniofacial growth x Malocclusion Why early interventions?

SEPTEMBER 28, 2019 - MEETING

SATURDAY

- 16:15** Dr. Kenneth Lee (Australia)
What is your experience in Australia in dealing with Children with obstructive sleep apnea and breathing disorders? What type of approach do you use and what are its main objectives?
- 16:45** Coffe break/poster session
- 17:15** Dr. Patrick Mckeown (Ireland)
Why is Buteyko method so important? What is the trajectory of Buteyko method around the world and how to use it in obstructive sleep apnea?
- 17:45** Dr. Mike Mew (England)
Which type of interventions do you make when you have a child with obstructive sleep apnea? Is it a high prevalent problem on your clinical life?
- 18:15** Dr. John Mew (England)
In your life experience, what is the relevance of re-establishing the correct breathing to allow the correct craniofacial development? How about the double direction of effects: incorrect breathing leading to malocclusion and malocclusion leading to incorrect breathing?
- 18:45** Closing ceremony
Posters awards
Announcement of next IFUNA and next WSEI meeting
- 21:30** White Party
